## Electrification sets for RoundTable.

System consisting of four- and six-connector block strips with different assignments for integration in the cable stowage compartment of the RoundTable tables.

According to the table below, different combinations of

- Schuko socket-outlets with a 3 metre long power connecting cable per strip,
  - plugs for CAT6 category RJ45 data lines,
  - VGA audio plugs,
  - XLR plug connectors for analog microphone and speaker signals, and
  - HDMI plugs for audio and video data
- are available to choose from.

Data connections or connections for picture and audio signals are supplied without supply leads. The individual connection blocks each have the same number of inputs and outputs on the back and front of the strip.
